Energy finance & industry

Energy & the environment

Energy engineering

Energy & public policy

To discuss potential sponsorships and partnerships, contact Suellen Aldina, Director of Engagement and Administration: suellen.aldina@duke.edu, 919-681-4908

Other Ways to Support Energy at Duke

Your gift to the Duke University Energy Initiative can pave pathways in education, research, and engagement.

Education

- Expand the range of **courses** for undergraduates in energy finance, engineering, policy, and business.
- Help hire **Professors of the Practice** and **Executives in Residence** - energy experts bring professional experience to the classroom.

Interdisciplinary Research

- Provide **seed funding** for innovative energy research.
- Give students opportunities to work alongside mentors to **tackle energy problems**.

Engagement

- **Connect students with experts.** Support mentor and career advising programs, internships, and events such as Energy Week.

For information on how your gift can support the Energy Initiative, contact Barbara Collins, barbara.collins@duke.edu, (919) 681-0431, or make a gift at energy.duke.edu/support-us.

ALUMNI

Bring Your Energy Back to Duke

The Energy Initiative brings together world-renowned experts across a range of fields to collaborate on energy research, help inform energy decisions by business and government leaders, and educate tomorrow's energy innovators.

Duke Alumni are Found Across the Energy Sector

Finance & trading

Engineering

Oil & gas

Public policy & regulation

Renewable energy

Efficiency & demand management

Electricity supply

Equipment manufacturing

Help us by bringing your energy back to Duke

Be a mentor, field trip host or speaker. Share your expertise and career experiences by holding a mentoring conversation, hosting student visitors, speaking with us at lunch or participating in a panel.

Help our graduates take the next step. Share internship and career opportunities through the Energy Initiative's outreach channels. Get to know our students at the Energy Mix networking reception.

Participate in research. Partner with faculty and students on ground-breaking research, including Bass Connections in energy project teams.
