

## Preparing Tomorrow's Leaders to Meet Global Energy Challenges

The Duke University Energy Initiative helps **train future innovators and leaders** with the knowledge and skills they need to **advance our energy system and ensure a sustainable future**. We pool resources and faculty expertise from six schools across the university in an unparalleled interdisciplinary curriculum.

### LEARNING

Unique offerings like the MBA concentration in energy finance and the University Ph.D. Program in Environmental Policy—both the first of their kind—distinguish Duke University as a trailblazer in energy education.

**55** Energy courses 

**1,400** Energy students 

**6** Energy degrees/certificates 

### COLLABORATION

Through Bass Connections project teams, internships, faculty-mentored research and more, Duke students develop the applied skills that will help them to enter—and ultimately change—the global energy system.

**130+** Faculty teaching/researching energy 

**24** Bass Connections in Energy project teams 

### EXPERIENCES

Co-curricular activities and opportunities build students' knowledge and connections outside the classroom. Events include:

- Power Lunches and mentoring sessions, where energy professionals share expertise and discuss their career paths.
- Power Trips, where students get a first-hand look at energy-producing facilities, research labs and businesses.

**20+** Student events annually
